NorStone at the What Hi-fi Sound & Vision Show.

November 3rd to 5th 2006

Novotel London West

Booth "Sauternes"

NorStone is a French brand of Hi-fi and Home Theatre accessories that has been introduced really recently in the UK.

NorStone activity is today divided into 3 ranges of products: **NorStone Design** for the AV furniture, **NorStone Mount** for the brackets and mounting systems, **NorStone Cable** for the cables and interconnects.

NorStone Design brings a fresh new face to the traditional world of audio and home cinema racks. Through the use of innovatory designs and materials, the **NorStone Design** team offers the discerning customer AV furniture which is both modern and classic, and exclusive but affordable.

On the NorStone booth you can discover examples of products which best exemplify the NorStone Design ethos. The Piu range matches purity of design and technical functionality with the use of natural materials, to produce both an effective AV system solution and a beautiful addition to the home.

Also on show, for the first time in the UK, is the revolutionary new Century design. Its leather-look finish places it right at the cutting edge of interior design.

The NorStone Design range of stands and racks will be complemented by two more UK firsts – the introduction of the new range of **NorStone Mount** plasma brackets and the first product releases under the **NorStone Cable** brand.

The complete range of NorStone products is distributed in the UK by **Machines for Living** (www.machinesforliving.co.uk). You can order NorStone products through your hi-fi or home cinema specialist dealer, usually for next day delivery. For details of your local supplier, call 0845 370 0470 or email enquiries@machinesforliving.co.uk.
